application. In some embodiments, for example, the paper product can have a basis weight from about 1 to about 50 pounds per 2,880 square feet (i.e., ream), and in some embodiments, between about 5 to about 45 pounds per square ream. For instance, paper towels can sometimes be formed to have a basis weight of from about 10 to about 45 pounds per ream, and in some embodiments, between about 20 to about 30 pounds per ream. Suitable cellulosic fibers for use in connection with this invention include secondary (recycled) papermaking fibers and virgin papermaking fibers in all proportions. Such fibers include, without limitation, hardwood and softwood fibers as well as nonwoody fibers. Noncellulosic synthetic fibers can also be included as a portion of the furnish. It has been found that a high quality product having a unique balance of properties can be made using predominantly secondary fibers or all secondary fibers.

**IN THE CLAIMS:**

Please cancel claims 1, 11, 27, and 39.

Please amend claims 2-4, 6-10, 12-17, 28-32, 34-38, and 40-44 to read as

follows (See also Appendix B):

- a<sup>2</sup>
2. (Amended) A paper product as defined in claim 45, wherein said water comprises between about 40% to about 70% by weight of said lotion.
  3. (Amended) A paper product as defined in claim 45, wherein said emollient component comprises between about 1% to about 10% by weight of said lotion.
  4. (Amended) A paper product as defined in claim 45, wherein said emollient component includes a linear primary alkyl ester of benzoic acid.
- 
- a<sup>3</sup>
6. (Amended) A paper product as defined in claim 45, wherein said fatty alcohol
